

 **VITA STR**
SWIM TRAIN RENEW

Vitality for Life extends beyond peak physical performance; it includes a zest for life that radiates from within. People who possess it have a passion for sharing their joy with others, exude a sense of inner peace, and stand out from the crowd as they shine. Since vitality is often thought to be predominantly physical traits, it's tempting to say the source is simply good health. But Vitality is a complete lifestyle of embracing every moment to the fullest. Vita STR swim spas give the opportunity to Swim, Train, and Renew any time of the year giving you the edge in life.

SWIM

Swimming does wonders for the body, strengthening major and minor muscles while creating an enjoyable outlet for cardiovascular engagement. It provides a zero-impact workout that preserves the joints for longevity of life. Swimmers of every age and from every country embrace swimming as a fun way to unlock their body's full potential and engage in a total-body routine. So grab your suit and towel and hit the water year round.

TRAIN

You can train in the gym with everyone else or you can train at home. Training at home in water has many benefits that a gym does not. Aerobic exercise in water adds resistance to each motion, magnifying the benefit of your efforts. Strength training with weights and resistance bands in water at 85°F allows your body to operate better and longer without the drained feeling of overheating. And your buoyancy in water also allows you to manipulate equipment slow and controlled to focus on specific movements and form. Such training elevates your workout, which in turn elevates your ability to thrive in daily life.

RENEW

After an intense swim, training session, or long day it's important to allow yourself to renew. Water's calming and healing capabilities bring rejuvenation to the body and mind. Soothing sounds and weightlessness relieve tension and aches to help you rest and bring a peaceful end to your day. Renewal is just as important to your vitality as exciting activities.

4 SEASONS

Swim season doesn't have to end, water can continue to bring excitement and relaxation year-round. You can maintain your workout schedule and enjoy your aqua social gatherings from January to December. Vita STR Swim Spas give you the freedom to enjoy a vital lifestyle year round.

Northern Exposure

Northern Exposure® is the ultimate swim spa insulation system. This patent pending thermal barrier technology recycles the free heat energy for more efficient heating and lower energy costs. All four sides of the swim spa, plus the floor and cover, are lined with copper material to reflect radiant heat energy generated from the pumps back into the swim spa. Heat is absorbed back into the plumbing helping raise and maintain water temperature. Finally the entire exterior of the swim spa is wrapped in 3M Thinsulate® Insulation, the same incredible material utilized in winter clothing. This three layer patent pending system ensures energy created by the spa stays in the swim spa.

HYDRO- DYNAMICS

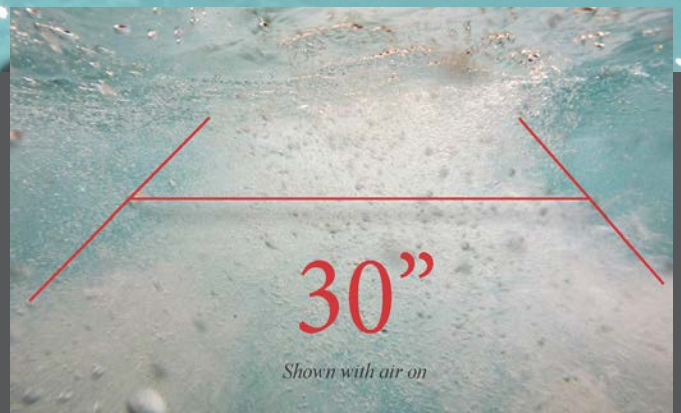

The current you swim in affects your ability to control and stabilize your direction. For the most effective results in a swim spa, you must be able to adjust the power and have jets that aid you in taking full advantage of the lap lane. Speed, sleekness, and continuous motion of the water combine to create an energizing experience and let you embrace your potential.

The jet propulsion system on the STR series swim spas uses proprietary 'Anti-Turbulence' technology to boost and smooth the swim stream for the ultimate swimming experience. Anti-turbulence technology creates a powerful, smooth, variable jet stream that is completely adjustable and designed to allow you to swim at your individual fitness level.

With a jet propulsion system over 30" wide, the STR swim spas have a powerful advantage of propellers or paddles when creating a challenging swim experience.

CLARITY

Clarity of mind and body are both reached with clean sources. While a bright and clear mind brings invigoration of the senses, clear water means your skin absorbs only the purest elements for multiple health benefits. A daily soak or water workout can reduce your blood pressure, blood sugar, and speed healing. But the proper equipment is crucial to keeping your swim spa - and you - functioning in optimum condition.

High quality water treatment is one of the most important features to consider when evaluating a spa. Both CleanZone and CleanZone Ultra utilize ozone to sanitize your water. CleanZone® Ultra adds UVC light, the same technology utilized in many communities around the world to purify drinking water. CleanZone® Ultra kills 99.9% of microorganisms, bacteria, viruses, and parasites, making this the perfect sanitization system for your Vita STR swim spa.

Ozone/UV Combination

Ozone only

VITA STR

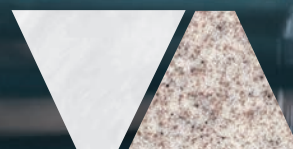

SWIM TRAIN RENEW

Athletes and workouts come in all sizes, and there is a Vita STR series swim spa for each of them. Each model features a spacious swim lane, social and massage seating, and various connections for additional fitness equipment. From twelve feet for quality workouts in compact space, to eighteen feet with a separate hot tub, find the swim spa that meets your backyard space, massage needs, and fitness goals.
